

International Data Security

“Floating” Co-location facilities secure from natural disasters

Managed Hosting Services

- Individual Secured Data rooms in Tier 1 thru 4 configurations
- Monitoring and Managing
- SAN and NAS Storage Services
- Help Desk / Call Center
- Business Continuity and Disaster Recovery
- Professional Services

Additional Onboard Facility Services

- Private Office Facilities
- Overnight Accommodations
- Ships Galley (food) service
- Meeting rooms

Green Efficiency of the Data Ship Concept

- Recycle of decommissioned/mothballed ships rather than being sold for scrap
- Back up generators powered with Bio Diesel Fuel with high capacity fuel storage
- Recaptured equipment heat for ship heating, lowering PG&E heating costs
- Sea water used in cooling AC towers reducing AC power demands by 30% to 40%
